ABSTRACT

ERIC

This is the fifth of five volumes comprising a directory of public and nonpublic elementary and secondary day schools in the United States and outlying areas for 1968-69. Volumes I-IV list (by geographical region) the public schools. This volume lists the nonpublic schools (alphabetically by State), including parochial schools, privately operated nonsectarian schools, privately operated schools for the physically and mentally handicapped, private college preparatory schools or military academies, finishing schools, and laboratory schools of private colleges and universities. Institutional information includes grade span; number of pupils in prekindergarten and kindergarten, elementary grades, and high school; number of teachers in each of these categories; number of high school graduates in 1967-68; and type of school or affiliation. Indications are provided as to types of programs offered, including regular day school programs, special programs for the handicapped, vocational education programs, special programs for the educationally disadvantaged, and adult education programs. Related documents are EA 002 919, EA 002 918, and EA 002 866. (DE)

FOREWORD

This publication is one of five volumes comprising a directory based on the 1968-69 universe of public and nonpublic elementary and secondary day schools in the United States and outlying areas. Volumes I, III, and IV list (by geographical region) the public schools.

This is Volume V and covers nonpublic schools in the United States. It lists data for 97 percent of the known nonpublic schools in the Nation. The school names were obtained from the education agencies of each State and outlying area, State education directories, and lists of schools that came to our attention in other ways.

The 1968-69 survey of elementary and secondary schools was conducted primarily to establish a current population frame for sampling schools. Nonpublic schools were included because they represent a significant sector of elementary-secondary education, and their inclusion in this overall effort offered an opportunity for obtaining current basic information about these schools. Also, this publication in directory form answers the needs of many public and private research and planning agencies that require data for individual schools. It also enables the National Center for Educational Statistics to respond uniformly to numerous requests received for information about individual schools.

For their cooperation and the completeness of the data reported, we are indebted to State, district, local public and parochial school superintendents, and nonpublic school principals in the States and areas represented. For their high sense of responsibility, untiring efforts, and attention to detail, we owe thanks to the statistical and clerical personnel of the National Center for Educational Statistics, particularly to Linda A. Barker, Lynn Fox, and Beatrice O. Mongello of this Branch.

Carol J. Hobson, Chief Elementary and Secondary Surveys Branch

INTRODUCTION

Description of Directory

The U.S. Office of Education has undertaken, for the first time, to compile and issue a comprehensive listing of every elementary and secondary day school, both public and nonpublic, in the Nation. Earlier publications were narrower in scope and contained only partial information. For example, OE published 12 directories of public secondary schools between 1912-13 and 1958-59; usually these were limited to accredited institutions and sometimes included accredited nonpublic secondary schools. Also, OE issued two nonpublic school directories, for 1960-61 (secondary only) and 1965-66 (elementary and secondary). No attempt had ever been made before, however, to include the public elementary schools.

To avoid the extreme bulkiness of a single-volume list, the 114,000 schools in the 1968-69 survey are presented in five parts--the public schools in four separate regional volumes and all the nonpublic schools in another.

The regional groupings for the public schools are as follows:

Volume I, North Atlantic

Connecticut	Maryland	New Jersey	Rnode Island
Delaware	Massachusetts	New York	Vermont
Maine	New Hampshire	Pennsylvania	District of Columbia

Volume II, Great Lakes and Plains

Illinois	Kansas	Missouri	Ohio
Indiana	Michigan	Nebraska	South Dakota
Iowa	Minnesota	North Dakota	Wisconsin

Volume III, Southeast

Alabama	Georgia	Mississippi	Tennessee
Arkansas	Kentucky	North Carolina	Virginia
Florida	Louisiana	South Carolina	West Virginia

Volume IV, West and Southwest and Outlying Areas

Alaska Hawaii New Mexico Utah Arizona Idaho Oklahoma Washington California Montana Oregon Wyoming Colorado Nevada Texas

Outlying areas of the United States and overseas schools for American dependents also appear in this volume.

The volumes are being published as the processing of data is completed, their order depending largely upon the rate and adequacy of response from all of the States in each region.

This publication, volume V, covers the nonpublic schools in the United States and outlying areas. Schools are arranged alphabetically by State, post office, and name of school, with identification of the religious affiliation, if any, and the name of the county in which they are located. Also shown are 1968-69 statistics on grade span, number of pupils, number of teachers, program offerings, and number of 1967-68 high school graduates (summary by State on page 10).

About 97 percent of all known nonpublic schools in the United States and outlying areas are listed in this volume, regardless of their accreditation status.

Collection of the Data

Data were gathered by means of OE Form 2304, the same form used to obtain information for the public schools. The request for data on nonpublic schools was sent to each State or area educational agency. Of the 57 jurisdictions included in the survey, 30 States and 5 outlying areas provided the data on forms or punched cards derived from records available in the State or area central office, three States collected the data from nonpublic schools and sent them on to us, and 18 States and Puerto Rico directed us to the individual schools for information. To obtain the names of all private and parochial schools, listings were requested from various national school organizations, whose officials were most cooperative. These lists were used to supplement the information received from State education officials, particularly in States where contact with the non-public schools has not been customary (or even legal, in a few instances). Thus, with the assistance of many public and nonpublic school agencies we have been able to develop this directory containing data for 18,718 schools.

Although data collection had been scheduled to close by the end of December 1968, responses were delayed for a number of reasons and close-out of receipts was postponed until June 1969. Where questionable report forms were received after closeout, the school names and addresses are listed by State at the end of the directory along with nonresponding and incompletely reported schools which we have reason to believe are still in operation.

Coverage

Included in the survey were all schools operating at the elementary or secondary level and offering regular school subjects in the fall of the 1968-69 school year.

Excluded were separately organized kindergartens and prekindergartens; but the preprimary parts of elementary schools were included and their pupils and teachers, where separately available, are shown in this directory.

Also excluded were nonpublic evening schools devoted to adult education or vocational training, tutoring schools and clinics, custodial institutions without general education programs or whose inmates are served by public school teachers, nonacademic vocational or technical schools which offer training in selected skills rather than a regular academic curriculum, and junior colleges.

Definition of Terms

Nonpublic school. For purposes of the 1968-69 school survey, a non-public school is a school supported by means other than public taxation or public grants. The term includes parochial schools; privately operated nonsectarian schools; privately operated schools for the deaf, blind, mentally retarded, or students with other types of physical or mental exceptionality, for whom education equivalent to that of the public elementary or secondary schools is provided; private college preparatory schools or military academies; "finishing" schools; and laboratory schools of private colleges and universities.

Elementary, secondary. Respondents were instructed to report pupils and teachers by educational level. The classification of schools as elementary or secondary is based on definitions in Handbook I, The Common Core of State Educational Information. Thus, an organizational arrangement consisting of grades 1 through 12 is divided into grades 1 through 6 and 7 through 12, 1 through 8 and 9 through 12, or another pattern, depending upon the particular school district organization, i.e., whether 7th and 8th graders are taught as elementary-level students or as secondary-level students.

Grades beyond grade 8 are generally considered secondary. In some instances, however, such as in Amish or Mennonite communities, where it is customary for children to be kept in elementary school organizations

through compulsory school age, schools reporting grades 1 through 9 or 1 through 10 are shown as elementary, if so classified by the respondents.

Secondary school. This term encompasses all high schools, including junior high and intermediate schools as well as vocational and trade schools, if they offer academic work at a level beyond the elementary school and below college-level work. Middle schools are classified either elementary or secondary, as designated by the respondents.

Teacher. A teacher is defined as "a staff member performing assigned professional activities in guiding and directing the learning experiences of pupils in an institutional situation." Numbers of teachers are reported in full-time equivalents, meaning that they represent the number of full-time teaching positions, rather than the number of separate individuals employed full time or part time in teaching functions. For example, a principal or librarian who teaches half days is counted as 0.5 of a teacher, and an individual who comes into the school to teach music 2 half days per week, as 0.2 of a teacher. Teacher aides and assistants are not included.

Graduates. This term is defined as the number of pupils graduated from the 12th grade during the 1967 summer session and the 1967-68 school year, the year preceding that for which all other data are shown.

Programs Offered. The choice of programs offered was limited to five categories that are indicated in the directory by letter designation, as follows:

- R Regular day school program
- H Special program for the handicapped
- V Vocational education program
- D Special program for the educationally disadvantaged
- A Adult education program

If only adult or vocational education was checked, respondents were asked to verify that a general education program was being offered concurrently and that the school was offering regular day school classes before being included in this directory. Every effort was made to eliminate dual reporting of enrollment between regular day schools and specially organized vocational education (occupational) programs.

Findings of the Survey

The data in this volume represent the 18,718 nonpublic elementary and secondary day schools for which reports were received prior to closeout and found to be usable.

A comparison of nonpublic school data published for 1965-66 ½/ with figures derived from the current survey show a decline in schools of 7.8 percent, with 6.8 percent fewer elementary schools and 11.3 percent fewer secondary schools. Enrollment trends do not particularly coincide with the trend in the number of schools, however. For instance, elementary enrollment nationwide dropped 12 percent (from 4.929 million to 4.340 million pupils) while secondary enrollment declined 1.8 percent (from 1.376 million to 1.352 million pupils). This seems to indicate that the secondary schools being discontinued are probably the smaller units.

Percentage changes since 1965 in the number of nonpublic schools and pupils enrolled in them vary widely in individual States and do not necessarily parallel the national trends. A review of State changes reveals more decreases than increases in both the numbers of schools and enrollments. However, considerable growth in nonpublic school enrollment was evident in two States of the Southeast.

Much of the decline in the number of schools may be attributed to consolidation or closing of small schools, but the decline in enrollment seems to reflect the attrition in Catholic school population.

Abbreviations

School names are consistently abbreviated throughout the directory, except for initial or most significant words, including proper names of persons. Geographical place names, such as post offices, villages, and cities, are abbreviated, when too long for the allotted space, to the designations shown in ZTP Code Abbreviations for Use With ZTP Code (POD Publication 59).

Following is a post office list of two-letter State abbreviations used in this directory as needed:

 $[\]underline{1}$ / Data in this table represent the 18,718 nonpublic schools in the U.S. and the outlying areas for which reports were received. Reports not available for an estimated 180 schools.

2/ Pupils and teachers in separately organized preprimary schools not included.

4/ Kindergarten enrollments and/or teachers included with elementary data.
5/ Teachers estimated in some schools by the Office of Education.

^{3/} U.S. total represents data for States reporting; partial or no data on graduates reported for Arkansas, Iowa, Massachusetts, Missouri, Ohio, Texas, Washington, and the Trust Territory of the Pacific Islands.

NONPUBLIC

ELEMENTARY AND SECONDARY DAY SCHOOLS

BY STATE AND OUTLYING AREA

Notes to the Users of This Directory

Explanations which apply generally to data for an entire State appear as a headnote at the beginning of the listing.

An asterisk (*) at the left of a grade span entry indicates that data are not available separately for preschool pupils and/or teachers, although the school offers a preschool program. A blank in the space for teachers of kindergarten or prekindergarten programs shown without the asterisk indicates that less than one full-time-equivalent teacher was reported.

Symbols for type of program offered:

R - Regular day school program

H - Special program for the handicapped

V - Vocational education program

D - Special program for the educationally disadvantaged

A - Adult education program

Other symbols:

& And

Number, numero (in Spanish-speaking areas)

Abbreviations may alter the alphabetical placement of post office names and the normal order of listings. For example, in California, SAN Diego and SN Bernardino, with the same initial element, are widely separated, as may also occur for others when abbreviations are used, such as in postal names beginning with SAINT or ST, SOUTH or S, NORTH or N, etc. When post office names exceed 13 spaces, they follow the abbreviations shown in POD Publication 59.

* * * * *

In an effort of this magnitude—i.e., the listing of discrete items of information for approximately 114,000 institutions—errors and omissions are inevitable. Schools for which no data could be presented when the manuscript was being prepared for publication, but which were understood to be in operation during the 1968-69 school year, are listed by State at the end of the volume.

The user is invited to report to the Office of Education any omissions or significant corrections of data appearing in this directory.

INSTRUCTIONS AND DEFINITION OF TERMS

GENERAL. This survey is intended to develop data on schools "A SCHOOL is a division of the school system consisting of a group of pupils composed of 1 or more grade groups, organized as one unit with 1 or more teachers to give instruction of a defined type, and housed in a school plant of 1 or more buildings. More than one school may be housed in one school plant or building, as is the case when the elementary and secondary programs are housed in the same school plant."1/
"A TEACHER is a staff member performing assigned professional activities in guiding and directing the learning experiences of pupils in an instructional situation."2/ If a teacher is assigned only part-time to this school, with the remainder of his time available to other schools or to other activities, the time assigned to teaching in this school should be prorated on the basis of a regular teaching work week and added in to the calculation of full-time equivalents. F.T.E. is expressed in decimals, to the nearest tenth.

ITEM 1A. Leave this space blank

ITEM 1B. Enter school identification code used in your State, if any.

ITEM 2. If the school is located in a city which is not part of any county, enter here the name of the city.

ITEM 3. Use OFFICIAL name of district. The number requested here is NOT A CODE NUMBER assigned for data-processing identification, but is the numerical designation used in some States to properly identify the school district, such as River City No. 12, or Ashland R-4.

ITEM 5. Report here only work below college level

ITEM 6. A SPECIAL PROGRAM FOR THE HANDICAPPED refers to either physically or mentally handicapped pupils.

A SPECIAL PROGRAM FOR THE EDUCATIONALLY DISAD-

VANTAGED is a program which has as its purposes (1) raising the educational achieven ent of certain educationally deprived children to levels appropriate for their ages, and (2) otherwise compensating for educational disabilities suffered through experience and environment. Funds come entirely or in part from State or Federal sources.

A VOCATIONAL EDUCATION PROGRAM is an instructional program designed to prepare enrollees for employment and administered in accordance with the "approved" State Plan for Vocational Education.

An ADULT EDUCATION PROGRAM is an organized program to provide opportunity for adults and out-of-school youth to further their skills, knowledge, habits, or attitudes.

ITEMS 7, 8, and 9. Pupils and teachers should be reported on the same organizational basis. The data should be as of a date when the school has achieved enrollment stability for the Fall term, usually on or about October 1. If a school plant has both elementary and secondary grades, it should be considered as 2 schools, and separate report forms should be filled in for each level.

ITEM 10. The number of graduates should include those for the regular school year plus any 1967 summer school graduates.

ITEM 11. Respondent data may be omitted in States where the information is being supplied by the State education agency.
